 - C. The World Cup competition will be structured as follows:
 - 1. There will be a three and five gaited section of competition.
 - 2. There will be two Phases of the competition, referred to as Phase I and Phase II.
 - 3. Each Phase will consist of two segments:
 - a. Rail work: athletes will work at a walk, trot, and canter (five gaited may include slow gait and rack depending on horse availability) both directions of the ring. The competition manager will divide athletes into groups of sizes deemed manageable

with regard to the horses being used for the competition. Sections may be divided at the discretion of the hosting nation and the World Cup Rules Committee.

b. Pattern work to be executed individually. Each segment will be scored.

4. The above segments will be scored by a panel of judges (refer to Article 7, Scoring).

5. Each segment will count equally, and each Phase will carry equal weight in the final calculation.

6. Countries may elect to use their sixth rider at the beginning of the next segment (rail or pattern) in accordance with Article 4, section C.

7. Athletes will compete on not less than two horses during the competition. (Exception: Riders who are interchanged between segments may not compete on two horses.)

8. If these above guidelines are followed, all points from both Phases will be considered valid.

9. Substitution of horses

a. There will be NO SUBSTITUTION of horses unless a horse is sick, injured or a safety risk.

b. The Judges and /or the World Cup Rules Committee may rule on the safety risk of a horse. A rider may, in this circumstance, complete the competition on that team's sixth horse.

c. When a horse is eliminated because it is a safety risk, if there are still horses remaining in the pool, the team can redraw in order to replenish their quota of horses.

d. The official Veterinarian will be the only person authorized to validate a horse's soundness, sickness or injury and declare that horse withdrawn.

10. The Judges and/or the World Cup Rules Committee may rule on the safety risk of a rider. In this circumstance, a rider may be excused from competition and/or replaced with another member of the team.

11. Time outs

a. If, during the competition, a rider requires an official time-out (five minutes), USEF rules shall prevail. Should a rider require a second time-out (also five minutes), that rider must use their team's sixth horse. Failure to do so will result in elimination from that segment.

b. One time-out (five-minute) per horse per segment can be used for shoeing. If a shoe cannot be replaced, the horse's liaison may agree to let the horse continue without the shoe. If a horse cannot continue, refer to rule 11a.

c. During a timeout, the farrier if applicable, a groom, one representative for the horse and one representative for the rider (as appointed by the Country) may enter the arena and assist with the time out.

12. FALLS. The fall of horse or rider does not necessarily cause elimination, but is penalized at the Judge's discretion.

13. Rider Attire

As this is an open breed competition, the following rules regarding attire will apply:

a. Riders must wear informal attire for all segments and phases of the World Cup Competition, regardless of the time which the competition is being held. 2. If a rider has to substitute his/her horse from the general back-up pool only due to circumstances beyond the rider's and/or competition committee's control, that rider only will have the chance to an additional twenty (20) minute practice session, and not any other rider of that team and/or the whole team involved. Exception: Even under such circumstances, no additional practice session will be allotted to a team if the substitution occurs either during competition or in too close proximity to the start of competition to make holding such practice time feasible.

3. Beginning with the first official day of the competition, which is established by the latest arrival date as determined and publicized to all participants by the hosting nation, teams may not engage in private practice sessions. Private practice session is further defined as any group session not included in the official schedule of events as established by the hosting nation.

A. Scoring will be numeric throughout. An explanation of the numeric scoring system is as follows:

1. RAIL: Rail work will be evaluated using a numerical system based on a perfect score total of 100 from each judge.
2. PATTERN:

- (a) The individual workouts shall each be worth 100 points.
 - (b) Equal points for each segment, proposed to be 10 points per segment
 - (c) A workout to consist of 10 segments in total being 8 x pattern segments + 1 x Overall Picture segment + 1 x Horsemanship segment
3. ORDINAL CONVERSION: The numerical score given by the judges for each athlete at the conclusion of each phase (with phase defined as rail work, or pattern) will be converted into an ordinal, with each judge's highest numerical score converting to a '1', the next highest a '2', etc.
 4. The rider with the lowest raw score (not lowest ordinal) from each team will be dropped at the conclusion of each combined phase (rail and pattern).
 5. In the event of a tie, preference will be given to the athlete with the lower combined rail ordinal scores from all judges. If a tie still exists, preference will be given to the athlete with the lower combined pattern ordinal score from all judges. If none of the above methods are sufficient to break the tie, the lower combined total ordinal scores for the rail work and pattern segments of the competition as issued by ONE judge determined by the Committee to serve as the Referee shall have precedence. The referee shall be announced prior to the start of the competition, generally at the event where athletes draw for horses, order of go, etc.
 6. The grand total score for each team shall be a combination of the ordinals awarded by all judges from all rail work and patterns, minus the lowest raw score for each team as indicated above. The team with the lowest total ordinal score will be named the Gold Medal Winners, with the next lowest Silver and next lowest Bronze.
 7. Individual workouts are posted for coaches and riders to review and /or practice usually the day before the workout competition.
 8. Individual workout scores are totaled using a scribe and figures are relayed to the Ringmaster. Each rider's total workout scores (not individual workout segment scores) from the judges will be announced. Rail work scores are not to be announced. These scores will only be made public following the announcement of the Medal winners at the Awards Ceremony. Judges' names will be announced in association with the scores being read.
 9. Following the first combined phase, each team's Coach/Manager will be provided with a printout of only their team's individual workout and rail scores. During the second combined phase, the individual workout scores will also be announced, but no distribution or announcement of teams' rail scores will be made. The rail scores are not to be distributed until after the competition and will remain confidential to the scorer and the auditor only. Copies of full results to be provided by the host nation to the ISSEA representative for each nation within 30 days of the close of the competition.
- B. Awards for the World Cup will be presented to the top three scoring teams - customarily Gold, Silver and Bronze medals. Medals of participation are to be awarded to teams from any non-medal winning country.
